Exercise/Example Type & Source	Dates

WORK AND CALCULATIONS	ELABORATION

WORK AND CALCULATIONS	ELABORATION		
<del>                                      </del>			
☐ Exercise(s) is/are EASIER THAN / AS HARD AS / HARDER THAN I ex	pect exam questions to be.		
☐ The instructions are just like the text of an exam question.			
☐ My elaboration includes what my "first impressions" should be after reading t			
☐ The exercise, solution, and check sections are vertically separated and clearly labeled so it's easy to cover up and test myself. Everything is neat and spacious.			
☐ The solution includes every step that I have not yet mastered. ("Mastered" meaning I can do it perfectly and without			
thinking now and can't possibly forget it, e.g. 2 + 1 =)			
□ Each step is fully elaborated including: what I did, what it meant, why it's true, how I knew to do it. Word choice is			
mathematically precise. It will all make perfect sense to me in 6 months.			
☐ The final answer is in a box if necessary. Elaborations include how to check my answer and how I know I'm done. ☐ I covered the solution and check sections and reproduced it EASILY, explaining everything along the way. [This may			
take several attempts.]			
☐ Any questions I still have are written here. Any steps I don't understand yet I've memorized anyway. I included at			
least one incisive "What if?" question.
